Costs and Limitations for KeyChart 6.0

Capability and Description

2015 Edition criteria applicable to KeyChart Version 6.0 a5, a9, a12, a13, a14, b1, b2, d1, d2, d3, d4, d5, d6, d7, d8, f2, g3, g4, g5, g6

KeyChart Version 6.0 is a server based EHR that supports healthcare professionals in ophthalmology and optometry in outpatient ambulatory environments. It allows users to perform a wide range of functions such as to document, review, and edit patient health information including but not limited to problem lists, medication lists, medication allergy lists, family health history, and all aspects of the patient's eye exam.

KeyChart Version 6.0 requires integration of third-party components to perform the following tasks (fees may apply)

- electronically create prescriptions and prescription-related information for electronic transmission to pharmacies,
- measure CQMs (clinical quality measures) and to export these in standard file formats,
- be alerted to possible CDS (clinical decision support) interventions, and
- Report information to PHAs (public health agencies) and clinical data registries
- Portal related activities

Types of Costs or Fees and Additional Types of Costs or Fees

The costs and fees to purchase the software license or use the software in the Software as a service model will vary with the number of providers and users. Onsite training is available for separate per day fees. This certified product-version will require the signing of a contract when purchasing the product. The term of the contract will vary by whether the software as a service option the option for using an in-house server is chosen.

There is a monthly fee per provider fee for unlimited ePrescribing services.
