

Are you facing any of these issues?

- ✓ Incomplete MIPS Audit File
- ✓ You don't have time or the resources in your office to dedicate to MIPS

MIPS Reporting is Complex. myCare MIPS Assurance Will Simplify It.

What does your MIPS roadmap look like? Are you staying on top of the Merit-based Incentive Payment System (MIPS) reporting requirements and documentation? Do you know what you need in your MIPS Audit File? Are you sure that you are reaching your Medicare payment potential? If not, myCare MIPS Assurance can help you overcome the MIPS reporting challenges, maximize performance incentives, and avoid penalties.

But first, let us understand. What is MIPS?

MIPS is one of the two tracks (the other track is Advanced Alternative Payment Model) for value-based reimbursement under the Centers for Medicare and Medicaid Services (CMS) Quality Payment Program (QPP) to improve and innovate clinical activities.

MIPS ties payments to quality and cost of care. It focuses on reducing costs while improving care delivery and health outcomes. Payments to providers are adjusted based on their overall MIPS performance score, which is a significant incentive for clinical participation.

If you are a MIPS eligible clinician, your medical practice should be actively collecting data that highlights your performance in three of the four performance categories – Promoting Interoperability, Quality and Improvement Activities. The Cost category will be measured based on your claims data submitted to CMS.

How Does MIPS Impact You?

The final score of the four performance categories will determine what your Medicare payment adjustment will be, with the top performers earning the highest positive adjustments. Eligible clinicians that have low overall final scores may receive a low, neutral or even a negative payment adjustment. Those eligible clinicians that opt not to participate at all will incur a negative adjustment from CMS.

As you can see, successful monitoring, documenting, and reporting in MIPS will financially impact the bottom line as well as the overall rating of your practice.

How myCare MIPS Assurance Works?

myCare MIPS Assurance guides you through the MIPS process so that you can maximize your MIPS Final Score and ultimately, your future Medicare Part B reimbursements.

We are ready to help you succeed during the Performance Year:

We will create a customized MIPS performance and reporting strategy based on the past performance, scoring, size and scope of your practice and pinpoint areas of potential growth.

Along with helping you create a robust audit file, we will help maximize your scores with optimum workflow recommendations, measure monitoring and performance troubleshooting.

We will assist you with your attestations and registry reporting, verify final scores and payment adjustments and help you with any audits, appeals or targeted reviews.

We will take the administrative burden of regulations and documentation off of your plate so that you can continue to focus on delivering quality care.

Let's connect.
